Isabelle Gould

Bellevue, WA 98004 ◦ (425) 753.5465

hire.isabelle@outlook.com ◦ www.wispymouse.net

Overview

- C#, ASP.net, SQL, Unity3D, PowerShell, JQuery, CSS
- 5 years of various Software Developer disciplines across Web Development and Software Engineering
- Looking to contribute to Game Development in the King County area as a Software Developer or SDET
- Part of the *Magic the Gathering Arena*, *Halo Infinite*, and *Gatherer* teams

Portfolio

ProMa   *www.wispymouse.net*

- Personalized task tracking website that I've been using daily
- ASP.net, C#, LINQ and SQL, CSS, JQuery stack hosted on Azure

GitHub   *www.github.com/WispyMouse*

Employment

Software Engineer   *October 2018 – February 2019*
343 Industries (Lincoln Bay Contractor)

- Implemented more features and cleaned up legacy code in PowerShell-based email bots that organized tickets and development tasks for *Halo Infinite*
- Created websites for partners to use in remote access and data analytics, presented through ASP.net and pulling from SQL

Associate Software Developer Engineer in Test   *September 2017 - October 2018*
Wizards of the Coast

- Organized endpoint testing framework in C#, with supporting nightly automation in Jenkins and PowerShell to test *Magic the Gathering Arena*
- Provided large scale reports for the player experiences team; player behavior analysis, card opening statistics, Azure Insights analysis

Software Web Developer   *June 2017 ⋅ September 2017*
Wizards of the Coast (Rylem Contractor)

- Maintained the *Gatherer*, the official reference for *Magic the Gathering* cards, running off of a ASP.net and SQL
- Fixed Javascript and CSS bugs in legacy front end design
- Handled new card set migrations and release coordination

Junior C# Developer
Microsoft (Beyondsoft Contractor)

October 2016 · June 2017

- Rounded out the *Educator Portal* project, a system for university professors to observe and manage student Azure usage, running on ASP.net and JQuery
- Onboarded new university classes to Azure through SQL and browser automation
- Assisted with the *AIRS API* for Microsoft's internal billing for Azure usage

Associate Software Developer
Bulletin Intelligence

December 2014 · April 2016

- Added features to the internal news analyst browser-based software in JQuery
- Created customizable widgets for the new client-facing site, such as a calendar archiving system and grouping stories by media sentiment

Junior Software Developer
Gimblesoft

October 2013 · August 2014

- Developed *Battle Recruits*, a Snake-style game deployed on iOS and Android, alongside a 3D Modeler
- Migrated legacy website code base for a medical client from PHP to ASP.net

Education

B.S. Computer Science
ECPI University

August 2010 – May 2013
